RESOLUTION

The Baltic Assembly,

on the basis of the Declaration on Co-operation between the Baltic Assembly and the Benelux Interparliamentary Consultative Council;

taking into consideration the co-operation at the parliamentary level which is being successfully developed between the two interparliamentary organisations;

seeking closer co-operation between the regions of Baltic States and the Benelux countries;

and assessing the possibility of such co-operation as a way of achieving closer relations with the European Union,

recommends that the Baltic Council of Ministers should look for ways of more efficient and mutually beneficial development of regional co-operation between the Baltic States and the Benelux countries in the spheres of economy, trade and development of communications systems.
